

Research commercialization in Cambridge

Gareth Conduit

Alchemite[™] machine learning tool to

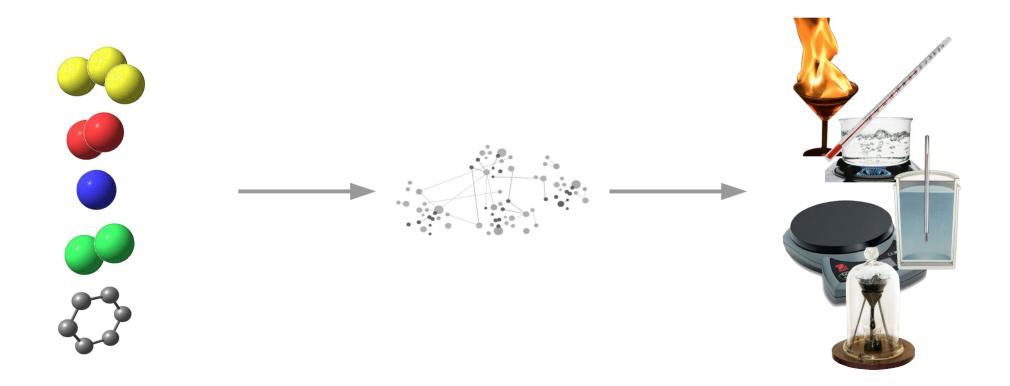

Utilise all available information: computer simulations and real-life measurements

Reduce the need for experiments and accelerate discovery

Broadly applicable with proven applications in drug design, industrial chemicals, and materials

Machine learning as a black box

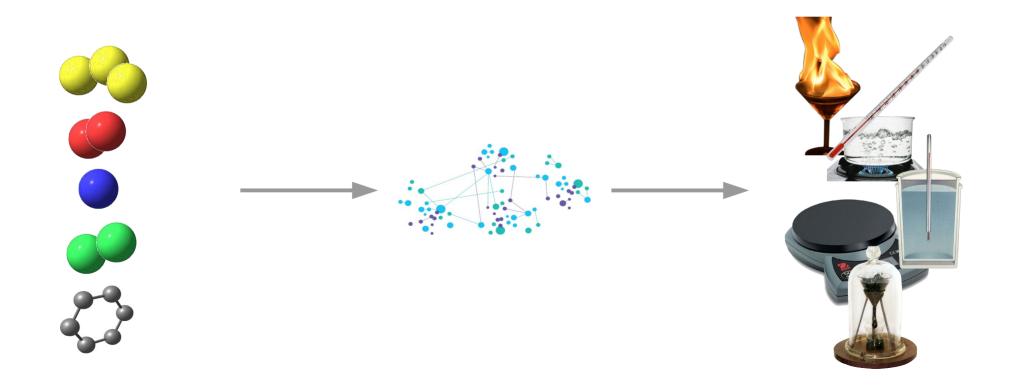

Train from historical data

Predict new chemicals

First foray into machine learning at University of Cambridge

2013

Multiple properties for Rolls Royce engines

Development of core machine learning ideas

2013 2014

Multiple properties for Rolls Royce engines Propertyproperty correlations with Rolls Royce and BP

Realign research focus to machine learning

Concurrent materials design

2010
Multiple
properties for
Rolls Royce
engines

2013

Propertyproperty correlations with Rolls Royce and BP

2014

Royal Society
University
Research
Fellowship

First large machine learning contract as principal investigator

I Society Experiment- versity simulation search correlations owship with Samsung Electronics
iر زو

Initial application of machine learning to drug discovery

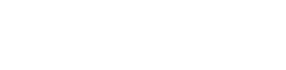

2013
Multiple
properties for
Rolls Royce
engines

Propertyproperty correlations with Rolls Royce and BP

2014

2015 Royal Society University Research Fellowship

Experimentsimulation correlations with Samsung Electronics

2016

Drug discovery study with etherapeutics

2017

Commercializing the methodology

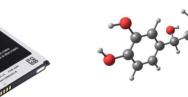

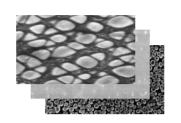

2013 2014 2015 2016 2018 2017 Multiple Founding of Property-Royal Society Experiment-Drug discovery Intellegens properties for University study with eproperty simulation Rolls Royce correlations Research therapeutics correlations with Samsung engines with Rolls Fellowship Royce and BP Electronics

Materials designed

Nickel and molybdenum

Steel for welding

Experiment and DFT for batteries

More materials designed

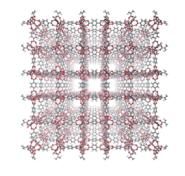

Ink formulations

Metal organic framework

Lubricants with molecular dynamics and experiments

Open Source Malaria competition

Open Source Malaria experimental validation

Optibrium & Intellegens

 $0.647 \mu M$

Open Source Malaria other compounds

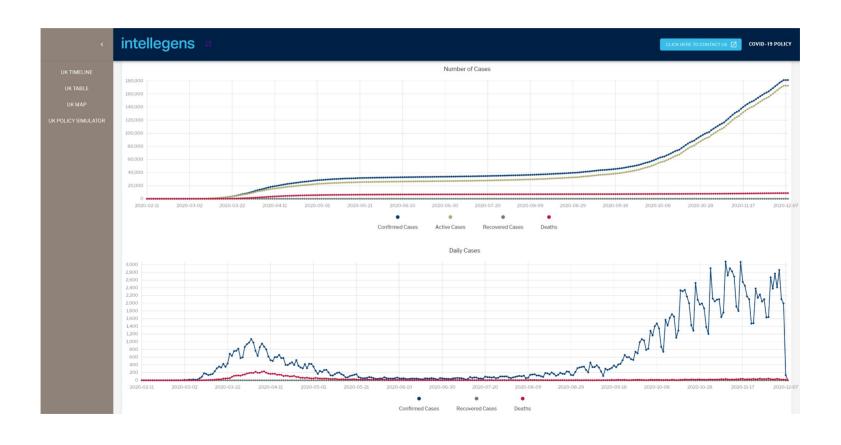

COVID-19 modeling: inputs

COVID-19 modeling: outputs

COVID-19 modeling: market

Utilise all available information: daily and weekly information from different countries

Predictive tool for supplier to anticipate market demand

Long-term application to seasonal diseases such as influenza

Initial contracts for Intellegens

therapeutics

2018

Bring across contracts from University

Starting the development of a product

Demonstrator for application of AI to experimental data

2018

2018

Bring across contracts from University InnovateUK grant

Enter the market as a reseller

Demonstrator for application of AI to experimental data

2018	2018	2018
Bring across contracts from	InnovateUK grant	Reseller agreement
University		with Optibrium

Build out technology through consultancy projects

Demonstrator for application of AI to experimental data

2018	2018	2018	2019
Bring across contracts from University	InnovateUK grant	Reseller agreement with Optibrium	Consultancy work

Launch Intellegens generic industrial formulations product

Demonstrator for application of AI to experimental data

2018	2018	2018	2019	2020
Bring across contracts from University	InnovateUK grant	Reseller agreement with Optibrium	Consultancy work	Release Alchemite Analytics™ product

Launch drug design product

therapeutics

optibrium

Demonstrator for application of AI to experimental data

ANSYS GRANTA

2018	2018	2018	2019	2020	2021
Bring across contracts from University	InnovateUK grant	Reseller agreement with Optibrium	Consultancy work	Release Alchemite Analytics™ product	Reseller agreement with Ansys

Questions for commercialization of research

Investment	Organic growth or seek venture capital

Breadth

Generic technology, but how many verticals should we enter?

Enter a vertical directly or through a reseller?

Sales

Seek maximum impact but opportunity to develop next idea

Exit strategy
