Knowledge & Networking Digital Event

1st – 4th December 2020

Key points for this session:

- For any technical issues please message Event Partners in the chat function
- Have a question for the speakers? Use the Q&A tab on your toolbar – these will be addressed at the end of the session as a group
- The video for this discussion will be available on demand to watch later - do check back on the Grip platform to see it again and discover more live sessions taking place throughout the week

Knowledge & Networking Digital Event

1st – 4th December 2020

Key Questions for Panel Discussion:

1. Are product manufacturers doing enough to digitise production?
2. Can we bring the innovation cycle down from years to months, or weeks? How do you plan sufficient scale-up time to reach cost competitiveness for customers?
3. What are the current pitfalls in 3D printing and what's needed to overcome them?
 - a. How can we reduce batch-to-batch variation?
 - b. How can producers overcome the high costs of 3D printing?
4. How can OEMs and end users collaborate to accelerate the adoption of new technology?
