

Train machine learning on 10 entries of Group 14 compounds and validate model

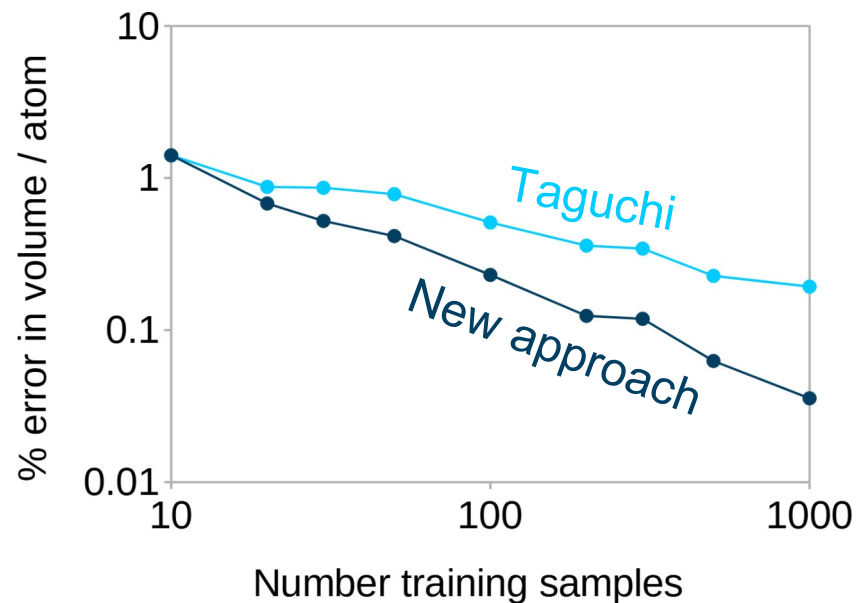

OPTIMADE: an API for exchanging materials data, arXiv:2103.02068

Train machine learning on **10** entries of Group 14 compounds and validate model

Machine learning requests **additional** results through API

OPTIMADE: an API for exchanging materials data, arXiv:2103.02068

Machine learning trained from **sparse** datasets

Merge simulations, physical laws, and experimental data
